

Asyut, Egypt. Save the Children (2016)

This dataset includes information from 578 children in the Asyut region of Egypt. Children were 4.5 years old on average. These data were collected as part of a baseline assessment of Save the Children's Early Literacy and Math (ELM) program.

Average learning and development scores in IDELA domains

Distribution of Total IDELA scores

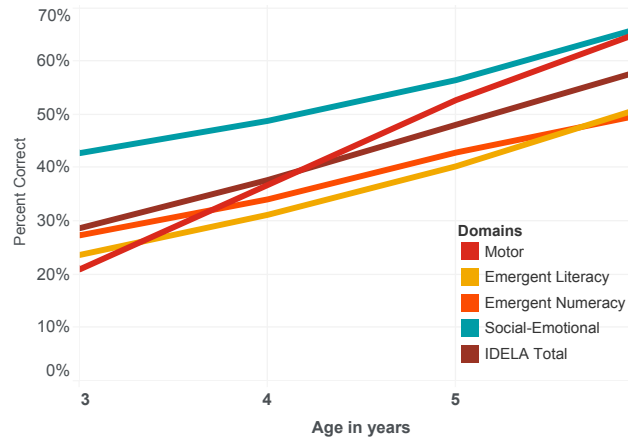

On average, children scored 43% correct on the IDELA assessment. There was a large range in children's skills but on the most common score on the overall assessment was 31-40% correct.

Distribution of children's ages

Average IDELA scores by child's age

Most children in the sample were 4 years old. Age was significantly related to children's overall IDELA score. On average, one additional year was associated with an additional 10 percentage points correct in overall IDELA score.

Distribution of children's gender

Average Total IDELA score by child's gender

54% of children in the sample were female. Girls scored significantly higher than boys on the total assessment.
