

Tlalpan, Mexico. Save the Children (2016)

This dataset includes data from 318 children in the delegation of Tlalpan in Mexico City, Mexico. Data was collected at 21 ECCD centers supported by Save the Children programs in March of 2016. The average age of children was 4.4.

Average learning and development scores in IDELA domains

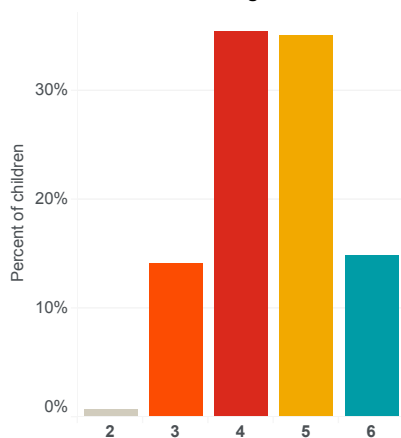

Distribution of Total IDELA scores

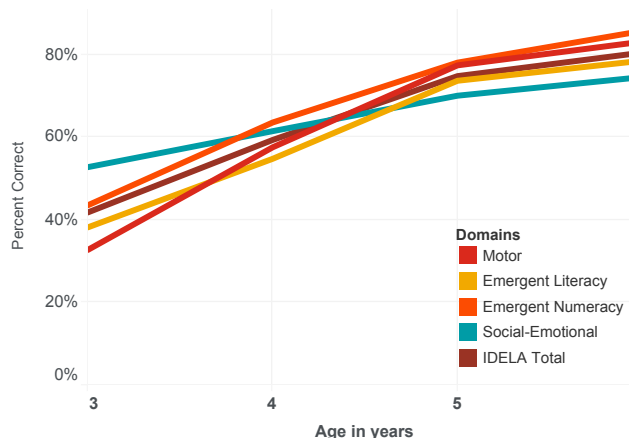

On average, children scored 65% correct on the IDELA assessment. A fairly large number of children displayed a high level of early learning and development, but many children still exhibited low levels.

Distribution of children's ages

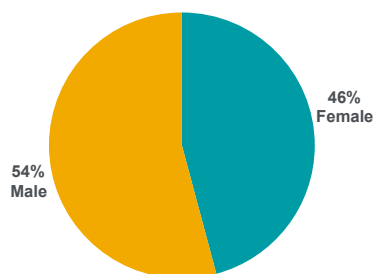

Average IDELA scores by child's age

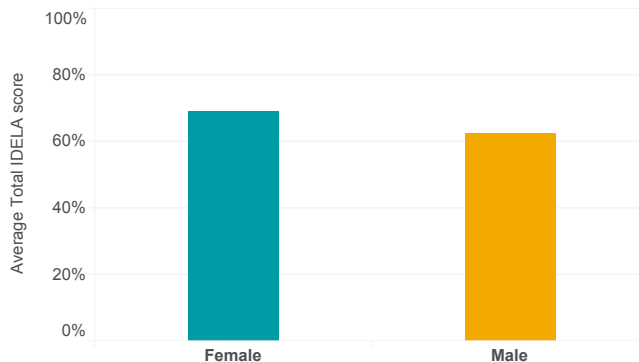

The age range was wide in the sample, but most children were 4 or 5 years old. Age was significantly and strongly related to IDELA scores. On average, one additional year was associated with an additional 13 percentage points correct in overall IDELA score.

Distribution of children's gender

Average Total IDELA score by child's gender

54% of children in the sample were male. There was a large and significant difference in IDELA scores by gender. On average, girls scored 7 percentage points higher on Total IDELA than boys.
