

Nakasongola, Uganda. Save the Children (2016)

This dataset includes data from 399 children and caregivers in Nakasongola district of Uganda. The data were collected as the baseline of a quasi-experimental impact evaluation examining standard ECCD and ELM ECCD centers. The average age of children was 5.09 years.

Average learning and development scores in IDELA domains

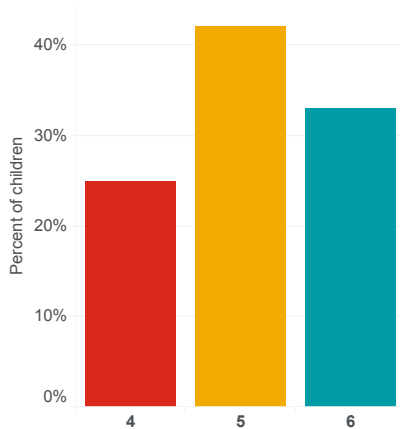

Distribution of Total IDELA scores

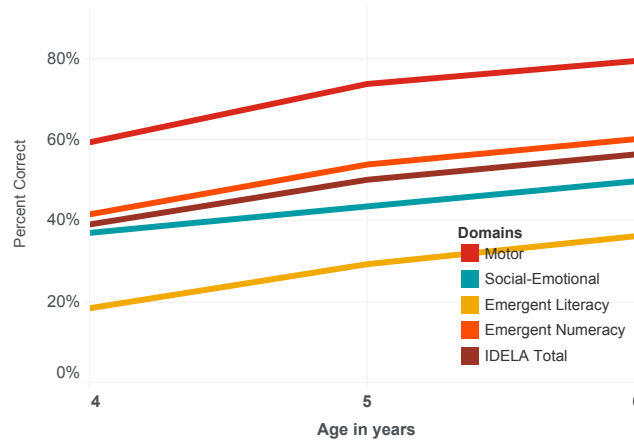

On average, children scored 50% correct on the IDELA assessment. The distribution of IDELA scores was fairly normal, with 51-60% the most common score range. However, nearly one in ten students scored below 30%.

Distribution of children's ages

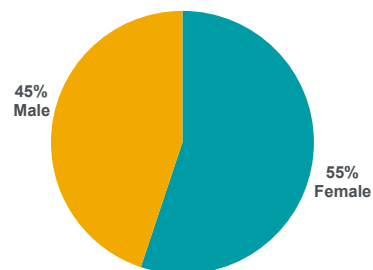

Average IDELA scores by child's age

Most children in the sample were 5 years old. On average, one additional year was associated with an additional 9 percentage points correct in overall IDELA score.

Distribution of children's gender

55% of children in the sample were female. Girls and boys did not differ in their IDELA Total scores.
