# Quang Nam and Yen Bai, Vietnam. Save the Children (2016)

This dataset includes data from 298 children and caregivers in Quang Nam and Yen Bai districts of Vietnam. The average age of children was 4.17. This data was collected in 2016 as a part of a baseline assessment of an implementation of Save the Children's Early Literacy & Math program.

**Average learning and development scores in IDELA domains**
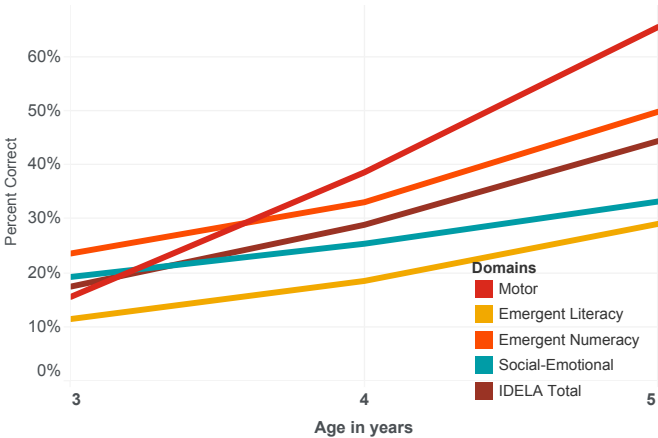

Distribution of Total IDELA scores

On average, children scored 33% correct on the IDELA assessment. While some children showed mastery of early learning and development skills, half of all children were unable to answer more than 30% correct.

**Distribution of children's ages**

Average IDELA scores by child's age

Most children in the sample were four or five years old. IDELA scores were strongly related to age. On average, one additional year was associated with an additional 14 percentage points correct in overall IDELA score.

Distribution of children's gender

55% of children in the sample were female. There were no significant differences in Total IDELA scores by gender.
